NEWS Madreperla Elements

Apreciados clientes, colaboradores y amigos, Con este News informativo comienza una nueva etapa de comunicación Interactiva de Madreperla Elements, desde donde os anunciaremos todas las novedades interesantes para vosotros.

El News irá informando sobre la creación de nuevos diseños, tendencias de moda, propuestas de estilos y nuevos materiales.

El News mostrará colecciones y nuevos productos realizados con nuestra principal estrella que es la Perla, en constante combinación con otros materiales como la plata y otros metales, preciosas piedras talladas o los prestigiosos cristales de Swarovski.

NUESTRO ORIGEN

Madreperla Elements fue fundada en Manacor (Mallorca - España), iniciándose en la producción de Perlas de Mallorca gracias a la amplia experiencia de sus fundadores en este sector y a un equipo técnico altamente cualificado que ha sabido depurar la técnica de producción de la Perla de Mallorca.

Desde sus inicios, Madreperla Elements ha hecho de su nombre una identificación perfecta con el producto que fabrica. Sus cuidados y exclusivos diseños están de acuerdo siempre con las últimas tendencias y confieren un aire selecto y sugerente a las piezas de bisutería que fabrica.

Nuestras colecciones originales y frescas cubren todo el arco, que va desde línea juvenil hasta quién desea personalizar la propia elegancia.

LA FABRICACIÓN

Las más bellas Perlas para la alta bisutería, son fabricadas por Madreperla Elements, que ha alcanzado la excelencia en la técnica de la producción de las Perlas de Mallorca.

La elaboración de las Perlas Madreperla Elements, se inicia por la formación del núcleo de la Perla de manera artesanal con una antigua fórmula que tiene dos importantes características: la temperatura correcta de fundición por el fuego y una especial adherencia, que garantizará el núcleo perfecto de una Perla y la correcta fijación de las diferentes capas de color que aplican nuestros maestros artesanos.

CONTROL DE CALIDAD Y SIGUIENTE PASO

Un riguroso control de calidad determina la calidad del núcleo para proceder al siguiente paso. A continuación se procede a cubrir el núcleo con un esmaltado especial de fabricación propia de Madreperla Elements, que dará a la Perla sus principales características: color y luminosidad.

La Perla es sumergida en esmalte varias veces para que esta vaya cogiendo capas, imitando el sorprendente proceso de la ostra cuando crea las Perlas naturales.

Una vez acabada la fase de esmaltado y el control de calidad, la Perla ya está finalizada. Nuestros maestros artesanos guiados por una herencia centenaria, anudan las Perlas una a una, creando nuestros collares, pendientes y pulseras.

GARANTÍA

Todas nuestras Perlas son comercializadas con certificado de garantía por un periodo de 10 años, que aseguran la sustitución de cualquier Perla no apta, siempre que no haya sufrido un trato inadecuado.

ENGLISH

NEWS Madreperla Elements

Dear clients, collaborators and friends, With this informative News begins a new stage of interactive communication of Madreperla Elements, from where we will announce all the interesting news for you.

The news will inform you about the creation of new designs, fashion trends, style proposals and new materials.

The news will show collections and new products made with our main star which is the Pearl, in constant combination with other materials such as silver and others metals, precious cut stones or the prestigious Swarovski crystals.

OUR ORIGIN

Madreperla Elements was founded in Manacor (Majorca-Spain), and immediately began the production of Pearls of Majorca thanks to the wide experience of its founders in this sector and a highly qualified technical team that has known how to define the technique of production of the Pearl at Majorca.

From the beginning, Madreperla Elements has made its name a perfect identification with the product it manufactures. Their careful and exclusive designs are always in line with the latest trends and give a select and suggestive air to the pieces of jewellery the manufacture.

Our original and fresh collections cover the whole range, from the youthful line to those who wish to personalize their own elegance.

THE MANUFACTURING

The most beautiful Pearls for high jewelry, are manufactured by Madreperla Elements, which has achieved excellence in the technique of production of the Pearls of Mallorca.

The elaboration of Madreperla Elements Pearls, begins by the formation of the pearl's nucleus, in a handcrafted way with an old formula that has two important characteristics: the correct temperature of fusion by fire and a special adhesion, that will guarantee the perfect nucleus of a Pearl and the correct fixation of the different layers of color that our artisan masters apply.

QUALITY CONTROL AND NEXT STEP

Rigorous quality control determines the quality of the core to proceed to the next step. Then the core is covered with a special enamel manufactured by Madreperla Elements, which will give the Pearl its main characteristics: colour and luminosity. The Pearl is dipped in the enamel several times so

that it takes on layers, imitating the amazing process of the oyster when it creates natural Pearls.

Once The glazing and quality control phase is finished, the Pearl is ready to be used.

Our master craftsmen, guided by a centuries-old heritage, knots the Pearls one by one, creating our necklaces, earrings and bracelets.

GUARANTEE

All our Pearls are sold with a guarantee certificate for a period of 10 years, which ensures the replacement of any unsuitable Pearl, provided that it has not been improperly treated.
